Abstract not available for HU 70035 (A2)

Abstract of corresponding document: EP 0556008 (A1)

A compound of the formula: <CHEM> wherein R is an optionally substituted aryl group or an optionally substituted aromatic heterocycle group; ring A is a 5 to 9 membered alicyclic group, in which one or more carbon atoms constituting said ring A may be replaced by O, S, SO, SO₂ and/or NR<1> (in which R<1> means hydrogen, alkyl, esterified carboxy group, carbamoyl or an acyl group) and/or said ring A may have an alkyl group as a substituent or its salt. The compounds of the present invention are useful as psychotropic agents such as antianxiety agents, anaesthesia antagonistic agents or cerebral function activators.
